

Casa Solís Pinot Noir

Technical Information

The harvest is precisely timed to ensure the grapes reach peak ripeness. After rigorous selection, the grapes are destemmed and left for 24 hours at 12°C. Fermentation occurs at moderate temperatures, around 22-24°C, to fully unleash the grapes' aromatic potential and colour. After malolactic fermentation, the wine is left on its lees for a few months to round out its character and express its full fruity profile.

Region

Wines of Chile continue the legacy of Spanish wine culture in the 'New World'. The rugged and wild landscapes, with the currents of the Pacific to one side and the Andean slopes to the other, allow excellent climatic conditions for the cultivation of varieties brought from the Old World: Cabernet Sauvignon, Merlot, Sauvignon Blanc or Chardonnay which prosper with indigenous grapes like Carmenera.
