

## Technical Information

The harvest is precisely timed to ensure the grapes reach peak ripeness. After rigorous selection, the grapes are destemmed and left for 24 hours at 12°C. Fermentation occurs at moderate temperatures, around 24-25°C, to fully unleash the grapes' aromatic potential and colour. After malolactic fermentation, the wine is left on its lees for a few months to round out its character and express its full fruity profile.
